Optimize Your
**In-House Vehicle
Operations**

Reduce The Cost of
**Your In-House
Vehicle Operations**

Simplify your transportation needs and increase efficiency!

In today's fast-paced business environment, **companies** are constantly looking for ways to **optimize operations** and reduce costs.

With the **MOBIRIDE Pool Vehicle Management** application, integrated with Mobiliz Tracking Systems, companies can **quickly respond to their employees' real-time vehicle usage needs.**

MOBIRIDE enables efficient planning of pool vehicle **usage and ensures smooth task** allocation.

Fleet pool managers can view employee requests through the application, manage them effectively, and generate reports. Employees can submit their vehicle requests via **web and mobile applications.**

Features That Make a Difference

MOBIRIDE is a user-friendly application that provides companies with real-time operational solutions for shared pool vehicle usage.

It can be accessed through both web and mobile applications.

While fleet pool managers can track vehicle requests through the system, employees and drivers can quickly and easily submit their requests to the pool vehicle managers via the mobile application based on their needs.

Fleet pool managers can monitor vehicle availability and report on employee reservations and usage.

Optionally, with the Bluetooth feature of the telematics device, drivers can use vehicles without a physical key via the mobile application. Functions such as door lock/unlock, engine start, and horn activation can be controlled remotely or through the mobile app.*

*Compatible with the DT435C device.
