

ADVANCED PACKAGE DT465B

#beyondtheroad

Internal
Battery

Multi-Sensor
Support

In addition to basic vehicle tracking **information such as location, speed, and idle status for passenger and commercial vehicles, it also offers the information and reporting business needed with extensive support** and an internal battery feature for users' benefit.

This package provides all the detailed information from the vehicle tracking system and **includes optional accessory support to report which driver is operating** the vehicle.

Even if the battery is removed, it continues to transmit data, **ensuring uninterrupted analysis and reporting capabilities.**

Advanced Package DT465B Features that Make a Difference

It allows the simultaneous use of temperature, driver identification, an emergency button, and a door sensor. It simultaneously offers driver identification and an in-vehicle voice alert system.

Allows simultaneous connection of door, cover, damper, and fuel cap sensors.

It continues to send information even if the battery is removed.

Allows the use of 3 temperature sensor connections at the same time.

It allows remote control of the vehicle through immobilizer (engine blocking system) management.

It features the most advanced and up-to-date GPS technology with more satellites and highly accurate location data.

Technical Features

Dimensions	: 73 x 54 x 22.7 mm
Weight	: 62 g.
Operating Voltage	: 8-32 Volt
Operating Temperature	: -30 °C ~ +80 °C
Certificates	: CE, E-Mark
Battery	: Li-Ion Polymer 250mA
