TACHO**WISE**

End-to End Digital Tachograph Process Management

*#beyond**theroad***

Increase Operational
Efficiency by Continuously Monitoring Driver Activity

Reduce Operational
Costs with Mobiliz's Card Hotel Service

With the Tachowise Digital Tachograph Solution, **owners of trucks, lorries, buses,** and other vehicles required to use tachographs for domestic and international transportation can **easily, quickly, and securely remotely transfer tachograph** and driver card data that must be reported in compliance with EU Regulations (AETR).

With Mobiliz's Card Hotel Service, **you can download your data remotely without relying on hardware or communication infrastructure**, reducing operational costs. You can seamlessly monitor driver activities and manage **your operations efficiently in compliance with rest, break, and working time regulations.**

TACHOWISE
Features that Make a Difference

With Mobiliz's Card Hotel Service, you can regularly download vehicle and driver files remotely without the need for any personnel intervention or dependency on hardware or communication infrastructure. The infrastructure allows transferring downloaded files to public authorities for supervision automatically or upon request via a web service. This ensures uninterrupted compliance with legal procedures. Your company cards are hosted in Mobiliz Card Hotel server centers throughout the service period, ensuring reliable and uninterrupted data download processes.

You can complete processes within legal timeframes by instantly downloading vehicle and driver data from the system whenever needed and transferring it to the central system daily.

You can instantly monitor your drivers' instant, daily, weekly, and 2-week driving times as if the tachograph indicator is with you and define violation notifications for exceeding the specified time.

You can access the Tachowise web application from anywhere with internet access and track the daily travel details of your vehicles and drivers.

With the multi-download feature, you can download multiple company cards simultaneously.

The validity period of company and driver cards, along with the calibration schedule of the tachograph device, can be monitored instantly.

For information regarding the compatibility of the tachograph brand and model with the tracking device, pleace contact our sales representative.
